Safety Information

General Care

Your handset ntains delicate electronic circuitry, magnets and battery systems. You should treat it with care and give particular attention to the following points:

 Do not allow the handset, battery or accessories to come into contact with liquids or moisture at any time. Do not immerse the handset in any liquid.

- Do not place the handset alongside computer disks, credit cards. travel cards and other magnetic media. The information contained or disks or cards may be affected by the handset.
- Do not paint the handset
- Do not leave the handset or the battery in places where the temperature could exceed 60 °C, e.g. on a car dashboard or a windowsill, behind glass in direct sunlight, etc.
- Do not remove the handset's battery while the handset is switched on.
- Take care not to allow metal objects, such as coins or key rings to contact or short-circuit the battery terminals.
- Do not dispose of battery in a fire. The handset's Li-ION batteries may be safely disposed of at a Li-ION recycling point. Follow local requirements for recycling.
- Do not put the handset's battery in your mouth, as battery electrolytes may be poisonous if swallowed.
- Do not attempt to dismantle the handset or any of its accessories
- Do not put a battery into a microwave oven, dryer, or high-pressure
- Do not contact battery directly to an electric outlet or cigarette lighter charger. Use only approved charger units.
- Do not pierce battery with a sharp object such as a needle.
- Do not disassemble or modify the battery.
- Do not use a damaged or deformed battery.
- Do not drop, throw, or subject the handset to rough treatment.
- Do not solder the battery directly.
- Stop using the battery if abnormal heat, odor, discoloration deformation, or abnormal condition is detected during use, charge, or storage.
- Remove the battery whose life cycle has expired from equipment immediately
- This equipment is fitted with an internal battery. Take it to a qualified service engineer when the replacement of the battery is required
- The earpiece may become warm during normal use. Also, the handset itself may become warm while the battery is being charged.
- When a handset is in vibration mode, the vibration can sometimes cause the handset to move.

- Be careful not to place the handset near heat sources (such as a heater) or too close to the edge of the table
- Power off your phone before you clean it. Use a damp or antistatic cloth to clean the handset. Do not use an ordinary dry cloth or electrostatic cloth. Do not use chemical or abrasive cleaners as these could damage the casing
- Remember to make backup copies of all important data on your handset.
- Remember to recycle: the cardboard packing supplied with this handset is ideal for recycling.

Warning:

In the unlikely event of a battery leak, take care to keep the battery discharge away from your eyes or skin. If the leakage does come into contact with the eves or skin, please flush thoroughly in clean water and consult with a doctor.

General Guidelines

- In some countries, national law prohibits private copying of copyrighted material. Please check the national legislation of the applicable country concerning the use of such material
- Many jurisdictions have laws and regulations about taking pictures in public or private areas and regarding the processing and further use of such pictures. The manufacturer encourages its customers to obey all laws and to respect the personal rights of others.
- Please check roaming agreement availability with your service provider.
- The use of mobile phones is not allowed in some radiation sensitive areas, such as hospitals, research centers and airplanes. The user is responsible to power-off the device. If there is any uncertainty, you should remove the battery from the handset
- Observe any signs that indicate powering off handsets, such as those near gas stations, or explosives, and power off the handset/device immediately.
- If you have a heart condition, be careful with the settings of call vibration or tone volume.

- Do not allow children to play with the handset, charger or batteries
- Do not use the handset where blasting is in progress
- Do not try to make a call or conversation while the temperature of charging battery is above 50°C.
- Take care not to put your handset in the back pocket of your trousers or skirt and then sit on it. Also, do not put your phone at the bottom of bag where it may subject to excessive weight or pressure. Doing so may damage the LCD and camera lens and cause them malfunction.
- The operation of some medical electronic devices, such as hearing aids and pacemakers, may be affected if a handset is used next to them. Observe any caution signs and the manufacturer's recommendations
- Do not leave the handset discharged or without a battery for a long time, otherwise some data may be erased.
- Your phone contains metal, which may cause you an itch, a rash or eczema depending on your physical condition.

Road Safety

- You must exercise proper control of your vehicle at all times. Give your full attention to driving.
- Observe all of the recommendations contained in your local traffic safety documentation.
- Pull off the road and park before making or answering a call, if driving conditions require so. Check if local laws and/or regulations restrict the use of handsets while driving
- You must not stop on the hard shoulder of a motorway to answer or make a call, except in an emergency
- Power off your handset at a refueling point, such as a gas station. even if you are not refueling your own car.
- Do not store or carry flammable or explosive materials in the same compartment as the handset
- Electronic systems in vehicle, such as anti-lock brakes, speed control and fuel injection systems are not normally affected by radio transmissions. The manufacturer of such equipment can advise if it is adequately shielded from radio transmissions. If you suspect vehicle

problems caused by radio transmissions, consult your dealer and do not power on the handset until it has been checked by a qualified technician.

Hospital Safetv

- Power off your phone and remove the battery in areas where the us of handsets is prohibited.
- · Follow the instructions given by the respective medical facility regarding the use of handsets on their premises.

Emergency Service

To make an emergency call in any country:

- 1. Ensure that your handset is on and in service.
- Press the End key as many times as needed to clear the display an ready the device for calls.
- 3. Enter the official emergency number for your present location, fo example, 112 (the international emergency number).
- 4. Press the Call key to dial the number. Follow instructions received and do not end the call until told to do so.

When the (U)SIM card is not inserted or when the dial lock function is o Press SOS and then enter the official emergency number for your preser location. Press the Call key to dial the number.

- Tell the operator which service you require: Police, Ambulance, Fi Brigade, Coastguard or Mountain Rescue Service, Tell them where you are and remain stationary to maintain contact if possible.
- Due to the nature of the cellular system, the connection of emergence calls cannot be guaranteed. You should never rely solely o any wireless device for essential communications like medica emergencies.

Third Party Equipment

The use of third party equipment, cables or accessories, not made o authorized by ZTE, may invalidate the warranty of your handset and also adversely affect the phone's safety/operation.

Vehicles Equipped with an Airbag

An airbag inflates with great force. Do not place objects, including either installed or portable wireless equipment, in the area over the airbag or in the airbag deployment area. If in-vehicle wireless equipment is improperly installed and the airbag inflates, serious injury could result.

Aircraft Safety

- Power off your phone before the airplane takes off. In order to protect airplane's communication system from interference, it is prohibited to use mobile phone in flight. If you want to use mobile phone before the airplane takes off, you should get aircrew's permission according to safety regulations
- If the mobile phone has the function of automatic timing power-on please check your alarm setting to ensure that your phone will not be automatically powered on during the flight.

Privacy Information

Camera usage and photo/audio/video recordings carried out with the handset can offend the confidentiality of the subjects. The user therefore is held to respect legislation in confidentiality matter and remains the only responsible subject in case of eventual violations of the enforced norm.

Copyright Notice

The video/audio recordings you make/download are protected by copyright laws. They are for personal use only and must not be otherwise used without the permission of the copyright owner.

Disposing of Your Phone

The symbol hack on the equipment indicates that the

refusal must be object of "separate collection"

Therefore, the customer will have to confer (or to make to confer) the refusal to the centers of differentiated collection predisposed from the local administrations, or to deliver it to the retailer in exchange of one new equipment purchased.

The differentiated collection of the refusal and the successive operation of treatment, recovery and waste help the production of equipment with recycle material and limit the hazardous effects on the atmosphere and the health eventually caused from one improper management of the refusal.

The illicit disposal of the product by the customer involves the application of the administrative endorsements of which to article 254 and following of the D.Las. 152. April 3rd 2006.

According to the article, the 13, D.Lgs, 25th July 2005, n. 151 "Performance of the Directives 2002/95/CE. 2002/96/CE and 2003/108/CE, relative to the reduction of the use of dangerous substances in the equipment electronic electrical workers and, let alone to the disposal of the refusals".
