1. Indicator
2. Front Cover
3. Modem Cap
4. USIM/SIM Card Slot
5. microSD card slot
6. USB Port

Set up your modem

1) Insert the SIM/USIM card into the USB modem

To install SIM/USIM card

- First put finger on the bottom finger grip, and then lift the front cover of the modem to release and remove.

Note: Do not open the front cover rudely so as to avoid the damage of the front cover.

- Insert the SIM/USIM card with the metal contact area facing downwards into the slot, and then push SIM/USIM card as far as possible.

2) Install the microSD card into the USB modem:

- Insert your microSD card into the microSD card slot, shown as the following picture.

Note: microSD  is a trademark of SD Card Association.

- Put the front cover of the modem flatly upon the body of modem. Direct the front cover towards the locking catches on the sides of the modem and push the front cover of the modem to lock the front cover into its place.

3) Connect the USB modem to your PC:

- Plug the USB modem into your computer's USB port and make sure that it is tightly inserted.
- The OS automatically detects and recognizes new hardware and starts the installation wizard.

Software installation guide

On different operating systems, the installation and removal procedures may differ.

Follow the system prompts during operation.

● For Windows system

Your system will start the software setup process automatically when you connect the modem to your computer correctly. Follow the system prompts to complete the software installation. If the system does not launch installation automatically, you can run the installation program in path of **My Computer** → **Mobinil USB modem** → **AutoRun.exe**.

● For Macintosh system

The system will automatically display a **Mobinil USB modem** CD-ROM icon on the desktop, when you connect the modem to your computer correctly. Double click the installation software package in the **Mobinil USB modem**, and follow the system prompts to complete the software installation.

Safe removal from your system

Close the Mobinil USB modem software, and then remove your modem safely.
