ZTE中兴 GSM

ZTE-G R237m

English   User Manual

Security

- To protect your mobile phone from illegal use, take the security measures as follows:
  - Set PIN codes of the SIM card.
  - Set handset lock code.
  - Set call restrictions.

Safety Precautions

This section includes some important information on safe and efficient operation. Please read this information before using the phone.

Operational Precautions

- Please use your phone properly. When making or receiving a call, please hold your phone as holding a wireline telephone. Make sure that the phone is at least one inch (about two point five centimeters) from your body when transmitting.
- Do not touch the antenna when the phone is in use. Touching the antenna area affects call quality and may cause the phone to operate at a higher power level than needed.
- Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when watching television or playing video games. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your phone or enabling a flashing-light feature on your phone. (The flashing-light feature is not available on all products.)
- Keep the phone out of the reach of small children. The phone may cause injury if used as a toy.

1

Do not use a dry cloth or electrostatically charged cloth. Do not use chemical or abrasive cleaners as these could damage the phone.

- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.
- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Keep your phone dry. Any liquid may damage your phone.
- Do not drop, knock or harshly treat the phone. Rough handling can break internal circuit boards.
- Do not connect the phone with any incompatible enhancement.
- Do not attempt to disassemble the mobile phone or battery.
- Do not store the phone with flammable or explosive articles.
- Do not charge the mobile phone without battery.
- Some electronic devices are susceptible to electromagnetic interference sent by phone if inadequately shielded. Please use phone at least 20 cm or as far away as you can from TV set, radio and other automated office equipment so as to avoid electromagnetic interference.
- Operating phone may interfere with medical devices like hearing aides and pacemakers, or other medical devices in hospital. Consult a physician or the manufacturer of the medical device before using phone.
- Be aware of the usage limitation when using phone at places such as oil warehouses, or chemical factories, where there are explosive gasses or explosive products being

3

processed, because even if your phone is in idle state, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.

- Do not touch the antenna while calling. Otherwise it will affect the quality of calling and waste battery energy. The damaged antenna will cause slight burn while touching your skin.
- Keep phone out of the reach of small children. Phone may cause injury if used as a toy.
- Do not put other things on the terminal to avoid overlaying radiator.
- Keep the antenna free from obstructions and position the antenna straight up. This will ensure best call quality.

Precautions for Potentially Explosive Atmospheres

- Switch off your phone prior to entering any area with potentially explosive atmospheres, such as fueling areas, fuel or chemical transfer or storage facilities.
- Do not remove, install, or charge batteries in such areas. Spark in a potentially explosive atmosphere can cause an explosion or fire resulting in bodily injury or even death.
- To avoid possible interference with blasting operations, switch off your phone when you are near electrical blasting caps, in a blasting area, or in areas posted "Turn off electronic devices." Obey all signs and instructions.

Precautions for Electronic Devices

- Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer of the device before using the phone if necessary.

4

Safety and General Use in Vehicles

- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmission. If you do meet problems above, please contact your automobile provider. Do not place your phone in the area over an airbag or in the airbag deployment area. Airbags inflate with great force. If a phone is placed in the airbag deployment area and the airbag inflates, the phone may be propelled with great force and cause serious injury to occupants of the vehicle.
- Please turn off your phone while at a refueling point, and the same to the place where the use of two-way radio is prohibited.

Aircraft Safety

- Please turn off your mobile phone before the airplane takes off. In order to protect airplane's communication system from interference, it is forbidden to use mobile phone in flight. Safety regulations require you to have permission from a crew member to use your phone while the plane is on the ground.
- If the mobile phone has the function of automatic timing power-on, please check your alarm setting to make sure that your phone will not be automatically turned on during flight.

Battery Use

- Do not short-circuit the battery, as this can cause the unit to overheat or ignite.
- Do not store battery in hot areas or throw it into fire. Otherwise, it will cause explosion.
- Do not disassemble or refit the battery. Otherwise, it will cause liquid leakage, overheating, explosion and ignition of the battery.
- Please store the battery in a cool dry place if you don't use it for a long period.

5

- The battery can be recharged for hundreds of times, but it will eventually wear out. When the operating time (talk time and idle time) is noticeably shorter than normal, it is time to replace it with a new one.
- Please stop using the charger and battery when they are damaged or show evidence of damage.
- Return the worn-out battery to the provider or dispose of it in accordance with environment regulations. Do not dispose of it in household rubbish.
- Please use original batteries or batteries approved by the phone manufacturer. Using any unauthorized battery may affect your handset performance or may cause danger of explosion, etc.

Warning: If the battery is damaged, do not discharge it. If the leakage does come into contact with the eyes or skin, wash thoroughly in clean water and consult a doctor.

RF Exposure

Specific Absorption Rate (SAR)

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2.0 W/kg and the highest SAR value for this device when tested at the ear was 1.42 W/kg². As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide.

As SAR is measured utilising the device's highest transmitting power, the actual SAR of this

6

device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

* The tests are carried out in accordance with EN 62209-1.

Body Worn Operation

Important safety information regarding radiofrequency radiation(RF) exposure.

To ensure compliance with RF exposure guidelines the phone must be used with a minimum of 15 mm separation from the body.

Failure to observe these instructions could result in your RF exposure exceeding the relevant guideline limits.

Limiting Exposure to Radio Frequency (RF) Fields

For individuals concerned about limiting their exposure to RF fields, the World Health Organisation (WHO) provides the following advice:

Precautionary measures: Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using 'hands-free' devices to keep mobile phones away from the head and body.

Further information on this subject can be obtained from the WHO home page http://www.who.int/peh-emf/ WHO Fact sheet 193: June 2000.

- Some electronic devices are susceptible to electromagnetic interference sent by phone if inadequately shielded. Please use phone at least 20 cm or as far away as you can from TV set, radio and other automated office equipment so as to avoid electromagnetic interference.
- Operating phone may interfere with medical devices like hearing aides and pacemakers,

7

or other medical devices in hospital. Consult a physician or the manufacturer of the medical device before using phone.

- Be aware of the usage limitation when using phone at places such as oil warehouses, or chemical factories, where there are explosive gasses or explosive products being processed, because even if your phone is in idle state, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.
- Do not touch the antenna while calling. Otherwise it will affect the quality of calling and waste battery energy. The damaged antenna will cause slight burn while touching your skin.
- Keep phone out of the reach of small children. Phone may cause injury if used as a toy.
- Do not put other things on the terminal to avoid overlaying radiator.
- Keep the antenna free from obstructions and position the antenna straight up. This will ensure best call quality.

Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages. The user should refer to the enclosed warranty card for full warranty and service information.

Note: The pictures and icons shown in the manual are just schematic drawings for demonstration of functions. If they are inconsistent with your handset, please take your handset as the standard. If the inconsistency exits in the manual because the handset function has been updated, please refer to the follow-up public information from ZTE.

9

Function	Description
Left soft key	Performs the function indicated at the left bottom of the screen.
Right soft key	Performs the function indicated at the right bottom of the screen.
Centre key	Press to confirm actions and make selections.
4-Way Navigation keys	These keys (UP, DOWN, LEFT and RIGHT) allow for navigation through menu options and quick access to some function menus.
Send key	Press to make a call, or answer a call, or view the call history.
End/Power key	Press to exit to the idle mode. Hold to switch on/off the phone.
QWERTY keyboard	Press to enter characters 0-9, the alphabets from a-z and symbols.

Note: In this User Manual, "press a key" means to press the key and release it, while "hold a key" means to press the key for at least two seconds and then release it.

Locking and Unlocking the Keypad

In idle screen, hold ☆ key to lock the keypad.

To unlock the keypad, press Left soft key and then ☆ key.

Locking the keypad can prevent unintentional operations on it. You can answer an incoming call with the regular operation when the keypad is locked.

11

Interface icons

Indicator	What it means	Indicator	What it means
	Signal strength		New SMS. Message box full when blinking
	GPRS		Missed call
	Silent		Battery status
	General		New MMS
	Outdoor		Roaming
	Meeting		Alarm clock set

Battery

The lithium ion battery of the mobile phone can be immediately used after unpacking.

Installing the battery

1. Pull the battery cover from the notch on the bottom and remove the cover.
2. Insert the battery by aligning the gold-colored contacts with the contacts in the battery slot.
3. Push down the upper section of the battery until it clicks into place.
4. Replace the battery cover and close it gently until you hear a click.

Remove the battery cover   Push down the battery   Replace the battery cover

12

Precautions While Driving

- Please pay attention to the traffic safety. Check the laws and regulations on the use of your phone in the area where you drive. Always obey them.
- Use hands-free function of the phone, if available.
- Pull off the road and park before making or answering a call if conditions require.

Precautions for Medical Devices and Facilities

- When using your phone near pacemakers, please always keep the phone more than eight inches (about twenty centimeters) from the pacemaker when the phone is switched on. Do not carry the phone in the breast pocket. Use the ear opposite the pacemaker to minimize the potential for interference. Switch off the phone immediately if necessary.
- Some phones may interfere with some hearing aids. In the event of such interference, you may consult your hearing aids manufacturer to discuss alternatives.
- If you use any other personal medical device, please consult the manufacturer of your device to determine if it is adequately shielded from RF energy.
- In those facilities with special demand, such as hospital or health care facilities, please pay attention to the restriction on the use of mobile phone. Switch off your phone if required.

Mobile Phone

- Please use original accessories or accessories approved by the phone manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, damage your phone or even cause danger to your body and violate related local regulations about telecom terminals.
- Turn off your phone before you clean it. Use a damp or anti-static cloth to clean the phone.

should be made directly to the respective content and service providers. Downloading album artwork to ZTE CORPORATION's music player will cause manipulation, modification or alteration of that artwork. Download of album artwork without permission may constitute an infringement of the artist's copyright in the album artwork and /or their moral rights.

ZTE CORPORATION does not accept and disclaims any liability for any copyright infringement or infringment of moral rights which may arise as a result of a User downloading album artwork to the ZTE CORPORATION music player. Users should ensure that they are permitted by the terms of their licence from a music/album artwork supplier to download and subsequently modify album artwork.

Removing the battery

1. Make sure that your mobile phone is switched off.
2. Remove the battery cover.
3. Pull the battery and remove it from the mobile phone.

Remove the battery cover   Pull up the battery

Inserting the SIM card

Insert the SIM card as follows:

1. Make sure that the phone is switched off and the charger is disconnected from the phone.
2. Turn the phone over and remove the battery cover.
3. Remove the battery if it is already installed.
4. Hold your SIM card with the cut corner oriented as shown and then slide it into the card holder with the metal contacts facing downward.
5. Replace the battery first.
6. Replace the battery cover.

13

Charging the battery

Your phone is powered by a rechargeable battery. For maximum battery performance, it is recommended that you first use up the battery power and then charge it completely. A new battery's full performance is achieved only after three complete charge and discharge cycles.

1. Connect your travel adapter to the left side of your mobile phone as shown in the diagram.
2. Connect the other end of the travel adapter to the mains socket.

When the battery is being charged, the display will show the animation of a battery being filled up. When the battery is fully charged, disconnect the charger.

Powering your phone on/off

Make sure that your SIM card is in your mobile phone and that the battery is charged.

Hold the End/Power key to power on/off the phone.

Text Input

- Text Mode

Your mobile phone provides the following input methods: alphabetic (abc, Abc, ABC) mode and numeric (123) mode. The current input mode is displayed on the screen above the input field. You can press Options →Input method to select the input mode.

15

- Basic way to make a call

In idle screen, press the numeric keys to input the number and press the Send key to dial.

- Dial from the Phonebook

Go to Menu →Phonebook. Find the name of the person you want to call, and press the Send key.

- Make an emergency call

You can make emergency calls without the SIM card inserted so long as you are in an area with network coverage.

- Answer a call

Press the Send key.

- End a call

Press the End key.

Make sure that you are in an area with sufficient coverage to make calls. The strength of the network signal is indicated on the Status Bar of the screen.

Sending and receiving messages

- Send a message

You can use your mobile phone to send and receive messages.

1. Go to Menu →Messages →SMS/MMS →Write message.
2. Write your message. For more information on input method, see section Text Input'. When you write an SMS, press Options →Send to, and edit the recipient. When you write an MMS, you can edit To, Cc, Bcc, Subject and content. In content field, you can select Options and then select to add picture, audio, bookmark text,

17

reminder and auto quick end.

Setting your phone

You can adjust various settings of your phone. Go to Menu→Settings.

- Phone settings: Set time and date and schedule power on/off, select language, set pref. input methods, display, greeting text and LCD backlight, etc.
- Network settings: Set to automatically or manually select network, and set the preferred networks.
- Security settings: Set security features to protect you from unauthorized use of your phone and SIM card.
- Connectivity: View data account.
- Restore factory settings: Enter the phone lock code to restore to the factory settings. Some personal information might be lost if you use this function, so be careful.

Note: You may be required to input the phone lock code in some of the security settings interfaces. The default lock code is 1234. Go to Security settings →Change password →Phone password to change the phone lock code.

Organizer

Go to Menu →Organizer.

- Calendar

Enter Calendar, the calendar of the current month will be displayed on the screen and the current date will be marked by a background box in a special colour.

You can click the dates, browse the dates, and click the direction arrows on the screen to switch the year and month; the information on the screen will also change consequently.

- Tasks

19

In List, you can refresh your playlist, set ringtone, or make personal settings.

- Sound recorder

Go to Options →New record to record a sound clip. Go to Options →Settings to set preferred storage, file format and audio quality. Go to Options →List to view the sound clips you recorded.

- FM radio

With the radio, you can search for radio channels, listen to them, and save them on your device. Note that the quality of the radio broadcast depends on the coverage of the radio station in that particular area. In the FM radio interface, you can press the Up/Down keys to adjust volume, press the Left/Right keys to tune the frequency, and press the Centre key to pause. Select Options to enter the submenu.

Extra

- Calculator

You can perform simple calculations. You can add, subtract, multiply or divide, and select M+, M-, MR, and MC to perform relevant operations.

Note: This calculator has limited accuracy and rounding errors may occur especially in long division.

- Currency converter

Your mobile phone provides you with basic functions of currency conversion. Input the Rate, select OK and input a figure in the Local field, and then press OK to get the result.

- Stopwatch

Use it to record the time.

- Flashlight

21

not support the service, these functions can't be used.

- WAP

Your phone supports Wireless Application Protocol (WAP). You can get access to this service through your network provider. WAP lets you get information about news, weather forecasts and more.

Go to Services →WAP. You can perform the following operations:

- Homepage: Homepage is a WAP site you set in Settings →Profiles.
- Bookmarks: Access your phone's preset websites. You can select a bookmark and press Go to to load the website or you can select Edit, Send, Delete, Delete all or Add bookmark.
- Recent pages: Display the pages you've visited recently. Select an item and choose Go to to visit the page again.
- Input address: Input a URL and press Options →Done to visit the site.
- Service inbox: Check the service information sent by your service provider.
- Settings: You can set Profiles, Browser options, Service message settings, Clear cache or Clear cookies.

- Licence manager
  - Licence list: Display the list of Licences.
  - Status: Check the version and time.
  - Advance: Select Sweep to remove useless licences and reboot your phone.

23

collection facilities appointed by the government or the local authorities.

3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.

For this product's recycling information based on WEEE directive, please send an e-mail to weee@zte.com.cn

EC DECLARATION OF CONFORMITY CE

It is hereby declared that following designated product:

Product Type: GSM Dual-band GPRS Digital Mobile Phone

Model No.: ZTE-G R237m

Complies with the essential protection requirements of the Radio and Telecommunication Terminal Equipment Directive (EC Directive 1999/5/EC), and the Electromagnetic Compatibility Directive (2004/108/EC).

This declaration applies to all specimens manufactured identical to the samples submitted for testing/evaluation.

Assessment of compliance of the product with the requirements relating to the Radio and Telecommunication Terminal Equipment Directive (EC Directive 1999/5/EC) was performed by American TCB(Notified Body No. 1588). Based on the following standards.

25

- Alphabetic Modes
  - Press A → Z to enter desired characters.
  - Press ⇧ to switch between uppercase and lowercase.
  - Press ␣ to enter a space.
  - Press ⌫ to delete letters left of the cursor.

- Numeric Mode

In numeric mode, use the numeric keys to enter numbers.

Notes: Letters cannot be entered in this mode.

- Entering Symbols

press Options →Input method →Insert symbol, then select desired symbol. Or you can press ⊞ first and then press the keys with the symbols you need on it.

Adding contact to the Phonebook

There are some numbers that you may want to call again and again, so it makes sense to add these numbers to your Phonebook. You can then access these numbers quickly and easily.

1. Go to Menu →Phonebook →Options →Add new contact.
2. Select to save the number to SIM or phone.
3. Edit the information and confirm by selecting Done →Yes.
4. You can also save a number right after you've made or received a phone call or a text message from someone who is not yet in your Phonebook list.
5. To delete someone from your Phonebook list, first select the name, then select Options →Delete.

Making and receiving calls

16

attachment and slide.

3. When you finish writing an SMS, select Options to send or save the message. When you finish writing an MMS, press Done, and select to send or save.

- Receive a message

Upon receiving a message, the mobile phone will alert you with a ringtone, prompt, or a new message icon.

1. Press Read to open the new message. You can also go to Inbox to read the message.
2. Use the Up/Down keys to view the message.
3. While the message is open, use Options to reply, delete, or forward the message. You can also call back the sender or save the sender's number.

User profiles

Go to Menu →User profiles. You can select Options →Activate to activate a profile. Or you can select Options →Customize to edit a profile.

Call center

Go to Menu →Call center.

- Call history

Dialed calls, Received calls and Missed calls are saved in Call history. If the records are full, the earliest saved records will be deleted.

Also, you can view call timers, call cost, SMS counter and GPRS counter in Call history.

- Call settings

You can set call waiting, call divert and call barring.

In Advance settings, you can set blacklist, auto redial, call time display, call time

18

You can add tasks in this menu,

- Alarm

You can view, and edit the alarm clocks settings. You can also enable or disable the alarms. By taping Edit, you can set the corresponding features of the alarm according to instructions: Repeat , Time, Alarm tone, Snooze, etc.

- World clock

You can view the time in different cities.

Games

Go to Menu →Fun&Games →Games.

Your mobile phone has classic games. Select a game and start it, you can view Help to see the rules of the game.

Multimedia

Go to Menu →Multimedia.

- Image viewer

The images you want to view in Image viewer must be put in the ...\ Photos folder in the phone or memory card, and in Options →Storage, the storage must be set to phone or memory card correspondingly.

You can select an image and view it.

- Audio player

You can play the audio in your phone or memory card.

The music you want to play in Audio player must be put in the ...\ My Music folder in the phone or memory card, and in List →Options →Settings →Pre. playlist, the storage must be set to phone or memory card correspondingly.

20

Press the Centre key or Left soft key to turn on or off the torch. Or you can hold the UP key to turn on or off the torch in idle screen.

File manager

Go to Menu →File manager. You can check all the folders in the phone or memory card; create new ones or rename, delete, or sort, etc. The files you download from the internet will be stored in these folders.

Note: When you select Format, the data will be lost, so please be careful with this function.

Camera

Go to Menu →Camera.

- Take a Photo

Go to Camera to take a photo.

Aim the camera at the object and then press the Centre key to take the shot.

- Configure your camera

Go to Camera. Press the Left soft key to configure your camera.

Using Services

Go to Menu →Services.

Services allows you to view internet content. In Services you can use the STK and WAP, and you can go to Licence manager to manage the licences.

- STK

SIM card Toolkit (STK) services are value-added services provided by your network provider.

Your mobile phone supports STK service, but if your SIM card and network provider do

22

Declaration of RoHS Compliance

To minimize the environmental impact and take more responsibility for the earth we live in, this document shall serve as a formal declaration that the ZTE-G R237m, manufactured by ZTE CORPORATION, is in compliance with the Directive 2002/95/EC of the European Parliament - RoHS (Restriction of Hazardous Substances) with respect to the following substances:

（1）Lead (Pb)

（2）Mercury (Hg)

（3）Cadmium (Cd)

（4）Hexavalent Chromium (Cr (VI))

（5）Polybrominated biphenyls (PBB's)

（6）Polybrominated diphenyl ethers (PBDE's)

This declaration is the responsibility of the manufacturer:

ZTE Corporation

ZTE Plaza, Keji Road South, Hi-Tech, Industrial Park, Nanshan District,Shenzhen, Guangdong, 518057, P.R.China

Authorised person signing for the company:

Xu feng   Quality Director Of ZTE Corporation

Name in block letters & position in the company

Shenzhen, 14th Feb 2011

Place & date   Legally valid signature

Disposal of your old appliance

1. When this crossed-out wheeled bin symbol is attached to a product it means the product is covered by the European Directive 2002/96/CE.
2. All electrical and electronic products should be disposed of separately from the municipal waste stream via designated
