# Internet Everywhere

## 3G+ quick start guide

orange™

# getting started

## welcome

to the world of Orange **Internet Everywhere**

you are now just a few steps away from experiencing
the simplicity of Orange **Internet Everywhere**

access the internet whenever you want wherever you are

only with Orange

# step 1 what you need

To run Internet Everywhere on your computer you will need the following:

one of the supported operating systems below:

- Windows XP (home and pro) 32 bits Service Packs 2 and 3
- Windows XP (tablet computer edition) 32 bits Service Packs 2 and 3
- Windows Vista (any edition) 32 and 64 bits initial version and Service Pack 1
- Windows 7 (any edition) 32 and 64 bits initial version
- Mac operating system version 10.4, 10.5 and 10.6

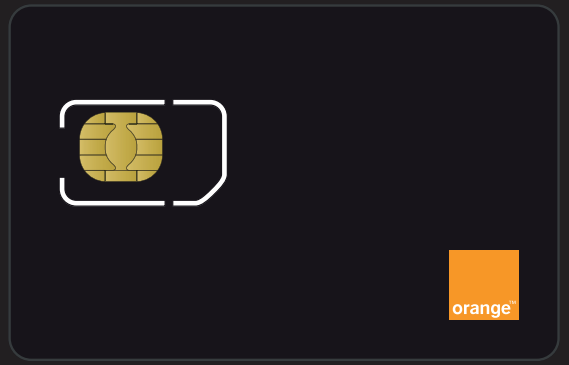
system prerequisites:

- minimum resolution of the screen 800 x 600
- CPU clock 1 GHz minimum
- 512 Mb of RAM

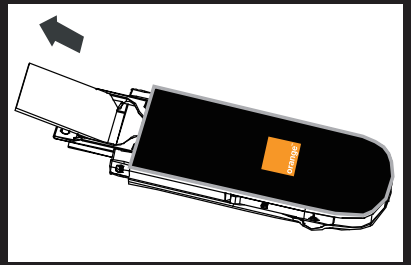
# step 2 insert your USIM card

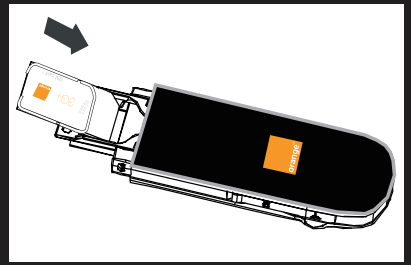
to install your USIM Card:

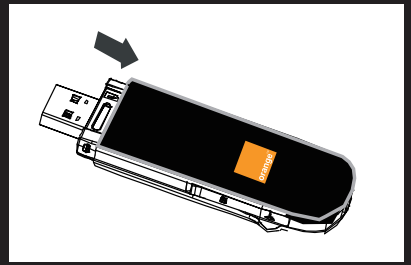
- remove the USIM card from its packaging without touching the gold contacts



- insert your USIM card into the USB dongle



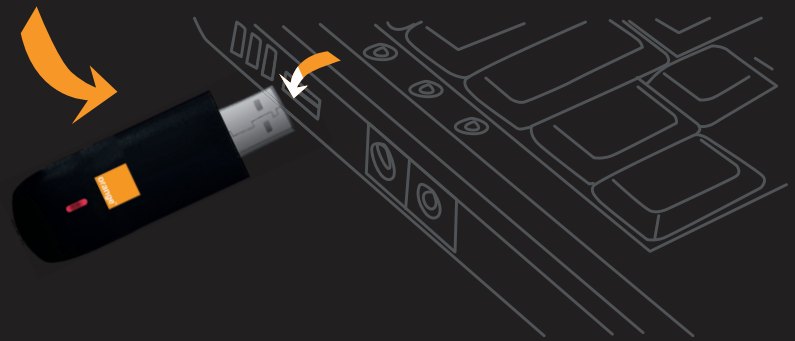




# step 3 plug and install your software

to install the Internet Everywhere software:

1 insert your USB dongle into your computer It would automatically start the installation. You will have to install the software only once. For faster installation, we recommend you disable your antivirus software.

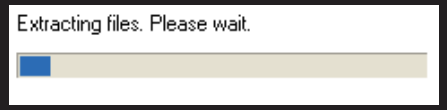


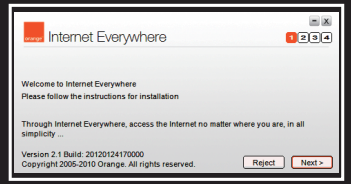
2 if you already have existing Internet Everywhere software installed on your computer uninstall it by clicking: start > all programs > Internet Everywhere close down your computer and restart without any network connections

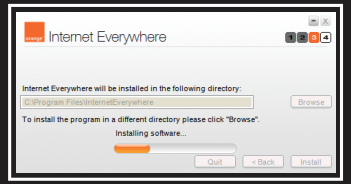
3 click on install connection kit (software installation)

4 please read the Internet Everywhere terms of use with this product before using Internet Everywhere software. If you agree to these Terms and Conditions, please click Accept.

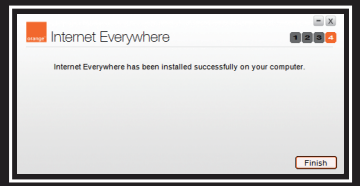
5 follow the on-screen instructions. The installation will take approximately 15 minutes to configure. A bar will appear showing the progress of the installation.







6 if the installation is successful, the message “Internet Everywhere has been installed successfully on your computer” will appear, click on finish. If the dashboard does not appear automatically, please restart your computer.



Note: the Internet Everywhere software will be installed to Start > Programs >Internet Everywhere

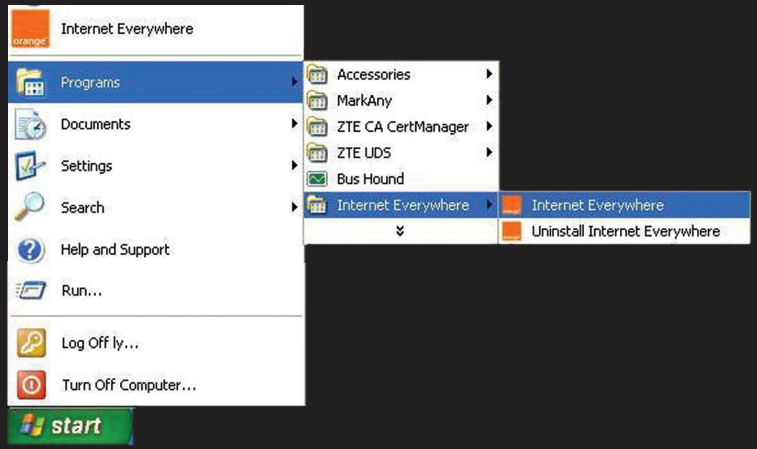
# step 4 launch Internet Everywhere

A. for Microsoft operating systems:

you can now launch the Internet Everywhere application in two ways:

- double-click the Internet Everywhere shortcut icon on your desktop

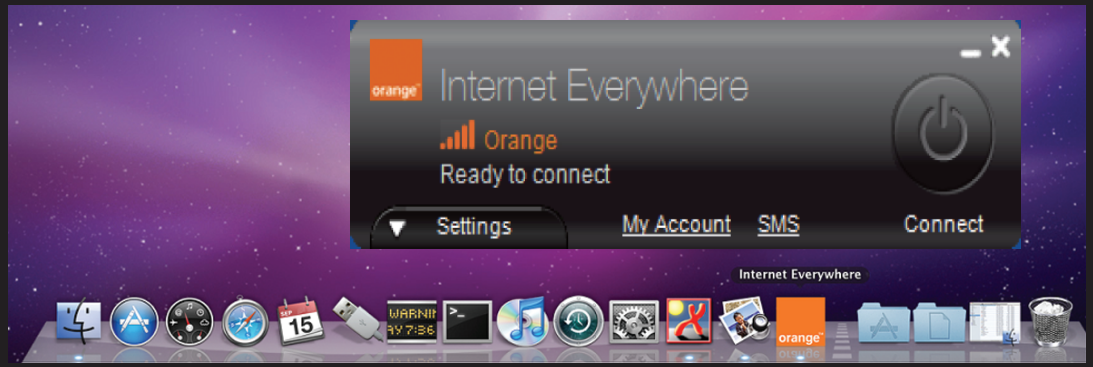
- or select Start > Programs > Internet Everywhere



B. for Mac operating systems:

Internet Everywhere software will be installed on the Mac OS under folder: Application > Internet Everywhere

Orange Icon will appear on the Mac OS dashboard upon starting the application. the Internet Everywhere dashboard will open, with the network name and signal strength appearing after a few moments



Click on ‘connect’ button in order to establish the internet connection and once connected, the button will change to ‘disconnect’.
