## Quick start guide Vodafone Smart Chat

**vodafone**

# Using this guide

Thank you for choosing Vodafone Smart Chat.

Your new phone will give you the full Internet experience when you're out and about, as well as great chat and entertainment features. Whether you're on the Vodafone network or on Wi-Fi, you can be connected wherever you are.

Some of the many functions of your new phone include:

- 2.6" QVGA touch display
- MSM7225A 800 MHz processor
- 3G/UMTS/ GSM Dualband, EDGE, Wi-Fi 802.11 b/g/n
- 512MB RAM, 512MB internal storage, MicroSD memory up to 32GB

For this product's user manual and additional supporting software, please visit the website below:

<http://www.vodafone.com/smartchat>

## Read me first

- To guarantee the Vodafone Smart Chat is always working at its best, please read this guide carefully and keep it for future use.
- The pictures, symbols and contents in this guide are just for your reference-they may be not completely identical with your phone.

# Product Safety Information

## Pictograms and Graphic Symbols

	Read the Safety Information section of this user guide on page 6 and 29		Do not use while re-fuelling
	Do not use hand-held while driving		This device may produce a bright or flashing light
	For body-worn operation maintain a separation of 1.5 cm		Do not dispose of it in a fire
	Small parts may cause a choking hazard		Avoid contact with magnetic media
	This device may produce a loud sound		Avoid Extreme Temperatures
	Keep away from pacemakers and other personal medical devices		Avoid any contact with liquid, keep it dry
	Switch off when instructed in hospitals and medical facilities		Do not attempt to disassemble
	Switch off when instructed in aircrafts and airports		Do not rely on this device for emergency communications
	Switch off in explosive environments		Only use approved accessories

## RF Exposure

Your phone contains a transmitter and a receiver. When it is ON, it receives and transmits RF energy. When you communicate with your phone, the system handling your call controls the power level at which your phone transmits.

### Specific Absorption Rate (SAR)

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested at the ear was 0.523 W/kg\*. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide\*\*.

As SAR is measured utilising the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

\*The tests are carried out in accordance with *[CENELEC EN50360] [IEC standard PT62209-1]*.

\*\* Please see page 8 about body worn operation.

## **Body worn operation**

Important safety information regarding radiofrequency radiation (RF) exposure

To ensure compliance with RF exposure guidelines the phone must be used with a minimum of 1.5 cm separation from the body.

Failure to observe these instructions could result in your RF exposure exceeding the relevant guideline limits.

## **Limiting exposure to radio frequency (RF) fields**

For individuals concerned about limiting their exposure to RF fields, the World Health Organisation (WHO) provides the following advice:

Precautionary measures: Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using 'hands-free' devices to keep mobile phones away from the head and body.

Further information on this subject can be obtained from the WHO home page <http://www.who.int/peh-emf>  
WHO Fact sheet 193: June 2000.

# Your phone and accessories

## What's in the box

Check your phone box for the following items:

- Vodafone Smart Chat device
- Battery
- USB power adapter
- PC data cable
- Stereo headset ( with the 3.5 mm jack )
- microSD card (2GBytes)
- Quick start guide

For more information about how to use your phone, please refer to the User Manual that is stored on the microSD card.

### **Tips:**

- The connector is used for data transfer and charging.
- Your phone has an internal memory storage allocation of 512MB and a 2GB capacity SD card is offered in the box. This should give you enough storage for normal use, but you can put in a larger SD card if you need more.

## Using the touch screen

You use your fingers to control your phone. The controls on your touch screen change dynamically depending on the tasks you are performing:

1. Touch the buttons, icons, or applications to select items or to open applications.
2. Touch and hold some items to get additional options.
3. To scroll through lists, move your finger up or down with a slide gesture. From Home screen, you can also slide left/right to browse the extended Home screen.
4. Touch and hold an icon on the Home screen or in the Main Menu to move it or to drag it to delete.

## Connecting to the Internet

The phone has been set up so that you can directly access the Internet or use your email accounts using your mobile network. To set up a new Wi-Fi connection, just open Wireless and networks tab from the Settings and follow the setup steps to connect your phone to a Wi-Fi network.

# Before turning on your phone

First, install the SIM card, microSD memory card as described below.

**IMPORTANT!** Power off your phone before installing or replacing SIM card.

## Inserting the SIM card

Insert your SIM card into the SIM slot. There is a diagram showing the correct orientation of the card printed above the SIM slot.

### Notes:

Removing or inserting the SIM card while the phone is switched on will lead to a reboot.

## Inserting the memory card

Insert your memory card into the memory card slot. There is a diagram showing the correct orientation of the card printed above the memory card slot.

### Notes:

The microSD logo  is a trademark of the SD Card Association.

## Charging your Phone

### Notes:

The new battery is not fully charged. When you first use the phone you should charge the battery beforehand.

To charge the battery, you have to:

Connect the PC data cable to the phone via the connector.

1. Connect the PC data cable to the USB adapter.
2. Connect the USB adapter to a standard AC power socket.

**Notes:**

- The shape of USB power adapter may differ according to your region.
  - The PC data cable connects the USB power adapter with the USB connector on one end and the phone with the connector on the other end.
3. Disconnect the charger when the battery is fully charged.

**Notes:**

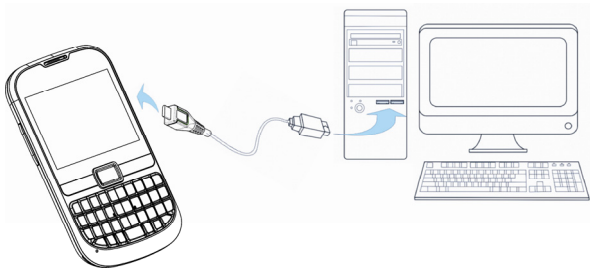

- If the battery is low, there will be a pop-up message on the screen.
- Touch the status bar to check the battery status.
- If the phone is powered on and the battery is charging, the icon  will appear on the status bar. When

charging is completed, the battery indicator  appears on the status bar.

## Connecting to a computer

You can connect your phone directly to a computer, using the PC data cable. Plug the USB connector on the cable into a USB port on your computer, and plug the phone connector into your phone.

As well as letting you share data to and from your computer, this will also let you charge your phone, but more slowly than by using the power adapter.

## Powering on/off your phone

1. Make sure that your SIM card is installed and the battery is charged.
2. Press the Power Key to power on your phone.
3. To power off your phone, press and hold the Power Key to bring up the Phone options panel, Select Power off , and then touch OK.

## Sleep mode

1. Sleep mode turns the display off and puts the phone in a low-power mode to save battery power. Your phone also goes into sleep mode automatically when you leave it idle after a certain period of time.
2. To put your phone in Sleep mode, give the **Power Key** a short press.

## Waking up your phone from sleep mode

1. Give the **Power Key** a short press to wake the display from Sleep mode.
2. Drag the lock icon down to unlock. Or if you've secured the lock screen, enter a pattern, PIN, or password.

# Getting to Know Your Phone

**Power key:** Press to turn on your mobile phone. You can also use this key to lock or unlock the display of your phone and put it into Sleep mode or wake it up.

**Home key:** Press to return to the Home screen.

**Menu key:** Press to open the menu on an active screen.

**Back key:** Press to return to the previous screen.

**Search key:** Press to open the **Quick Search Box**.

**Camera key:** Hold to open the camera and press to take the shot.

**Messages key:** Hold to open the message and write messages.

## Introduction to the Home screen

The Home screen extends beyond the left and right sides of the screen. This gives you multiple panels and provides more space for adding items. Slide your finger to the left or right to get the extended Home screen. From any panel, you can start an application by touch its icon or use the Apps menu on the right corner to enter the main menu.

<**Notifications bar**>: Displays the reminders and status icons of your phone. Flick down to open the notifications panel.

<**Shortcuts**>: Touch these shortcuts to start related applications.

< **Right side bar** >: Include the Browser, Apps menu and Dialer.

< **Vodafone weather and time** >: Include easy access of location weather and time:

**Time:** Access your world clock and check the time in cities around the globe. Set and save alarms, timers and the stopwatch.

**Weather:** Get instant access to the local weather report with temperature, UV index, wind speed and direction. Compare and save weather reports for up to nine different locations around the world.

## Adding items to your Home screen

- On the Home screen, make a long press on an empty area to get the **Add to Home screen** shortcut menu. If your screen is full you may not be able to add another item until you delete an existing one.
- Select the category and the item you want.

## Removing a Home screen item

1. Press **Home Key** to return to Home screen.
2. Touch and hold the item you want to delete until the  icon appears on the screen.
3. Drag the item into .

## How to open the Notification panel

Flick the status bar downwards from across the top of the screen to open the Notification panel, where you can see your calendar events, new messages, and current settings – such as call forwarding or call status. From here you can also open new messages, reminders, etc.

**TIPS:** You can also open the Notification panel by press **Menu Key > More > Notifications** from Home screen.

## Widgets

A widget works as a shortcut to let you preview or use an application.

You can stick widgets on your Home screen as icons or preview windows.

Besides the default widgets installed on your phone, you can also download more from the Play Store.

## Managing internal phone storage

### To view the phone space information

- Press **Home Key** >  > **Settings** > **Storage**.
- View the **Available space** in the **Internal storage** section.

### Managing internal storage

Your phone has an internal memory storage allocation of 512Mbytes theoretically, but most used for system

file, you can use only between 120 and 130Mbytes for yourself, you can view the **Available space** to query it. Managing the internal storage is very necessary. You can clean or manage the user memory by following methods:

- Applications update may have an impact on the phone memory, update selectively for memory saving.
- Some applications can be installed on the SD card but not all.
- Uninstall the applications in your phone memory.

### **Moving an application**

You can move applications downloaded or installed on your phone to the microSD card. You can also move applications to your phone if the microSD card is getting full.

**NOTE:** Not all applications can be moved to your phone or microSD card.

1. Press **Home Key** >  > **Settings** > **Applications** > **Manage applications**.
2. Touch the application you want to move below the **Downloaded** tab.
3. Touch **Move to phone** or **Move to SD card**.

### **Uninstalling an application**

You can uninstall applications installed on your phone.

1. Press **Home Key** >  > **Settings** > **Applications** > **Manage applications**.
2. Touch the application you want to uninstall under the **Downloaded** tab.
3. Touch **Uninstall**.

## How to reduce power consumption

If you reduce power consumption you can make your battery last longer. There are many ways to reduce it – for example:

1. Reduce the LCD brightness.
2. Use only 2G networks, as this uses much less battery power (but data is much slower):
  - Press **Home Key** >  > **Settings** > **Wireless & networks** > **Network settings** > **Network Mode**.
  - Select the **GSM only** to switch the network mode.
3. Sleep mode puts your device into a low-power-consumption state while the display is off, to save battery power. Your device also goes into Sleep mode automatically when you leave it idle after a certain period of time.
4. Cancel the Always-On Data Services. When you enable this option, more data traffic will be generated for automatic updates of applications data, and also means your phone will consume more power.
  - Touch **Home Key** >  > **Settings** > **Wireless & networks** > **Mobile networks**.

- Cancel the **Enable always-on mobile data** box to stop applications from uploading data automatically.

5. Reduce the number of widgets on your Home screen.

## Calling

You can make a phone call by dialing a phone number.

1. Touch  , then touch Dialer.
2. Press the blue number keys on the Qwerty keypad to enter the phone number.
3. Touch  or press  to dial.

When there is an incoming call, slide  to the right to answer the call or slide  to the left to reject the call. When you receive a call, you can press the Volume control key to mute the speaker.

## Entering Text

Your phone has a hardware keyboard – a compact version of standard computer keyboard. You can also use the onscreen Android keyboard to enter text. If the keyboard is enabled, it automatically appears on the screen when you enter a field or text box that needs text.

**NOTE:** On the text input screen, touch and hold the space where you usually write your text. An Edit text menu pops up, where you can switch input method, select text you've entered, or cut/copy and paste.

### Qwerty keypad

Alt key **alt**:

- Press once to enter the character on the top half of the key.
- Press twice to lock, so you only enter the characters on the top half of the keys, then press once to unlock this.

Sym key  Sym: popup a symbol page to select special characters.

Space key: input a space character (short keypress).

Shift key .

- Press once: input a capital letter.
- Press twice: lock the keyboard in capital letter input mode.

Del key .

- Delete a letter or word (short keypress).
- Continue deleting letters or words (long keypress).

## Android onscreen keyboard

## Personalising your phone

### Changing the wallpaper

- On the Home screen, press **Menu key > Wallpaper**.
- In the options menu, select a picture application.
- Select the wallpaper you want to use.

## Changing the ringtone

- On the Home screen, press the **Menu key > Settings > Sound > Phone ringtone**.
- Touch a ringtone in the list to listen to it.
- To set a selected ringtone, touch OK.

## Google+ service

Google+ makes connecting on the web more like connecting in the real world. Share your thoughts, links and photos with the right circles. Get everyone on the same page with fast and simple group chat.

This software is not default installed in Smart Chat. When you want to use it first, you must install it from SD card:

1. Make sure you have installed the microSD card on your phone.
2. Press **Home Key** >  > **File Manager**, and find the .apk file about google+ at the directory of **/sdcard/google+**.
3. Touch the file to start installation.
4. Read the installation instructions that come with the application and follow it to complete the setup.

## The open source code service

For this product's supporting open source code service, please read it on your phone:

On the Home screen, press the **Menu key** > **Settings** > **About phone** > **Legal information**.

Also you can visit the website below:

<http://support.zte.com.cn/support/news/NewsDetail.aspx?newsId=1002222>

# Product Safety Precautions

## Regulatory information

The following approvals and notices apply in specific regions as noted.

The declaration of RoHS compliance and EC declaration of conformity can be found in the end of this guide.

## Distraction

### Driving

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a phone while driving (even with a hands free kit) causes distraction and can lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

### Operating machinery

Full attention must be given to operating the machinery in order to reduce the risk of an accident.

## Product Handling

You alone are responsible for how you use your phone and any consequences of its use.

You must always switch off your phone wherever the use of a phone is prohibited. Use of your phone is subject to safety measures designed to protect users and their environment.

- Always treat your phone and its accessories with care and keep it in a clean and dust-free place.
- Do not expose your phone or its accessories to open flames or lit tobacco products.
- Do not expose your phone or its accessories to liquid, moisture or high humidity.
- Do not drop, throw or try to bend your phone or its accessories.
- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its accessories.
- Do not paint your phone or its accessories.
- Do not attempt to disassemble your phone or its accessories, only authorised personnel must do so.
- Do not expose your phone or its accessories to extreme temperatures, minimum  $-10$  and maximum  $+60$  degrees Celsius.
- Please check local regulations for disposal of electronic products.

Do not carry your phone in your back pocket as it could break when you sit down.

## **Small Children**

Do not leave your phone and its accessories within the reach of small children or allow them to play with it.

They could hurt themselves or others, or could accidentally damage the phone.

Your phone contains small parts with sharp edges that may cause an injury or which could become detached and create a choking hazard.

## **Demagnetisation**

To avoid the risk of demagnetisation, do not allow electronic devices or magnetic media close to your phone for a long time.

## **Electrostatic discharge (ESD)**

Do not touch the SIM card's metal connectors.

## **Power supply**

Do not connect your device to the power supply or switch it on until instructed to do so in the installation instructions.

## **Antenna**

Do not touch the antenna unnecessarily.

## Normal use position

When placing or receiving a phone call, hold your phone to your ear, with the bottom towards your mouth or as you would a fixed line phone.

## **Air Bags**

Do not place a phone in the area over an air bag or in the air bag deployment area.

Store the phone safely before driving your vehicle.

## **Seizures/Blackouts**

This phone is capable of producing bright flashing lights.

## **Repetitive Motion Injuries**

To minimise the risk of RSI, when texting or playing games with your phone:

- Do not grip the phone too tightly
- Press the buttons lightly
- Make use of the special features in the handset which minimise the number of buttons which have to be pressed, such as message templates and predictive text
- Take lots of breaks to stretch and relax

## **Emergency Calls**

This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.

## Loud Noise

This phone is capable of producing loud noises which may damage your hearing.

## MP3 and video player function

When listening to pre-recorded music or watching videos on your device, with headphones or earphones at high volumes, you run the risk of permanent damage to your hearing. Even if you are used to listening to music at a high volume and it seems acceptable to you, you still risk damaging your hearing. Reduce the sound volume to a reasonable level and avoid using headphones for an excessive period of time to avoid hearing damage.

Different headphones, earphones or ear buds may deliver a higher or lower volume, at the same volume setting on your device. Always start at a low volume setting.

Do not listen to music or video with headphones while driving.

## Bright Light

This phone is capable of producing flash of light or use as a torch, do not use it too close to the eyes.

## Phone Heating

Your phone may become warm during charging and during normal use.

### Phone Acoustic

To prevent possible hearing damage, do not listen at high volume levels for long periods.

## **Electrical Safety**

### **Accessories**

Use only approved accessories.

Do not connect with incompatible products or accessories.

Take care not to touch or allow metal objects, such as coins or key rings, to contact or short-circuit the battery terminals.

### **Connection to a Car**

Seek professional advice when connecting a phone interface to the vehicle electrical system.

### **Faulty and Damaged Products**

Do not attempt to disassemble the phone or its accessory.

Only qualified personnel must service or repair the phone or its accessory.

If your phone or its accessory has been submerged in water, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorised service centre.

## Battery Handling & Safety

Always switch the device off and disconnect the charger before removing the battery.

Only use the battery and charger supplied, or manufacturer approved replacements intended for use with your phone. Using other batteries and chargers could be dangerous.

Do not disassemble or short-circuit the battery. Accidental short-circuiting can occur if a metallic object such as a key, paper clip, or pen touches the terminals of the battery.

Improper battery use may result in a fire, explosion, or other hazard. If you believe the battery has been damaged, do not use it, take it to a service centre for testing.

## Interference

Care must be taken when using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

### Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

## **Hearing Aids**

People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby.

The level of interference will depend on the type of hearing device and the distance from the interference source, increasing the separation between them may reduce the interference. You may also consult your hearing aid manufacturer to discuss alternatives.

## **Medical devices**

Please consult your doctor and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

## **Hospitals**

Switch off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

## **Aircraft**

Switch off your wireless device whenever you are instructed to do so by airport or airline staff.

Consult the airline staff about the use of wireless devices on board the aircraft, if your device offers a 'flight mode' this must be enabled prior to boarding an aircraft.

## **Interference in cars**

Please note that because of possible interference to electronic equipment, some vehicle manufacturers forbid the use of mobile phones in their vehicles unless a handsfree kit with an external antenna is included in the installation.

## **Explosive environments**

### **Petrol stations and explosive atmospheres**

In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your phone or other radio equipment.

Areas with potentially explosive atmospheres include fuelling areas, below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

### **Blasting Caps and Areas**

Turn off your mobile phone or wireless device when in a blasting area or in areas posted turn off "two-way radios" or "electronic devices" to avoid interfering with blasting operations.

# Appendix

## Declaration of RoHS Compliance

To minimize the environmental impact and take more responsibility to the earth we live on, this document shall serve as formal declaration that the Vodafone Smart Chat manufactured by ZTE CORPORATION is in compliance with the Directive 2002/95/EC of the European Parliament - RoHS (Restriction of Hazardous Substances) with respect to the following substances:

Lead (Pb)

Mercury (Hg)

Cadmium (Cd)

Hexavalent Chromium (Cr (VI))

Polybrominated biphenyls (PBB's)

Polybrominated biphenyl ethers (PBDE's)

(Compliance is evidenced by written declaration from our suppliers, assuring that any potential trace contamination levels of the substances listed above are below the maximum level set by EU 2002/95/EC, or are exempt due to their application.)

The Vodafone Smart Chat manufactured by ZTE CORPORATION, meets the requirements of EU 2002/95/EC.

## Disposal of Your Old Appliance

1. When this crossed-out wheeled bin symbol is attached to a product, it means the product is covered by the European Directive 2002/96/EC.
2. All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.
3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.

For this product's recycling information based on WEEE directive, please send an e-mail to [weee@zte.com.cn](mailto:weee@zte.com.cn).

## EC DECLARATION OF CONFORMITY

C € 0700

It is hereby declared that the following designated product:

Product Type: *WCDMA/GSM(GPRS) Dual-Mode Digital Mobile Phone*

Model No.: ZTE P752D/Vodafone Smart Chat

**Complies with** the essential protection requirements of the Radio and Telecommunication Terminal Equipment Directive (EC Directive 1999/5/EC).

This declaration applies to all specimens manufactured identical to the samples submitted for testing/evaluation.

Assessment of compliance of the product with the requirements relating to the Radio and Telecommunication Terminal Equipment Directive (EC Directive 1999/5/EC) was performed by **PHOENIX TESTLAB** (Notified Body No.0700), based on the following standards:

Safety	EN 60950-1:2006+A11:2009; EN 50332-1:2000; EN 50332-2:2003
--------	---------------------------------------------------------------

EMC	EN 301489-1V1.9.2/-3 V1.4.1/-7 V1.3.1/-17V2.1.1/-24V1.5.1; EN 301489-34 V1.1.1
Radio	EN 301 511 V9.0.2; EN 300 328 V1.7.1;EN 301 908-1/-2 V5.2.1 EN 300 440-1 V1.6.1/-2 V1.4.1;
Health	EN 50360:2001/AC:2006; EN62209-1:2006; EN 62311:2008; EN62209-2:2010; EN 62479:2010

This declaration is the responsibility of the manufacturer:
