

TURKCELL T80 Upgrade Guide (Through SD Card)

1. Cautions

The software version and pictures in this document are just for reference only. Please use ZTE handset support website provided version to download software.

- 1) Download the upgrade package.
 - Open <u>http://www.ztedevice.com.cn/support</u> and download the upgrade package (update.zip) that matches your phone model. If the downloaded package is not **update.zip**, unzip the package to obtain it.
 - Ensure that your micro SD card is at least 2GB.

Note: Please refer to our current version download size.

- 2) Remove the SIM card before upgrade.
- Backup your data and APPs in your phone before upgrade. You can use third-part backup apps.
- 4) Verify that the update.zip file in the root directory of the SD card matches the model of the phone. Do not modify the file name and extension name of the files in the upgrade package.
- 5) Verify that your phone has enough (at least 40%) power. Charge the phone if required. To avoid data lost or upgrade failure, it is not recommended to upgrade your phone through an SD card when the phone is being charged.
- 6) You should not perform any other operation on the phone during the upgrade process.
- 7) A normal upgrade should be completed in about 4 minutes. If it fails, please try again. Any question you can contact the after-sale center to get support.

2. Update from system

1) Download the upgrade package that matches the phone model from ZTE official website (http://www.ztedevice.com.cn/support/), extract update.zip

from the package and copy it to the root directory of the SD card (the file name must be update.zip).

2) Check **update.zip** file in the root directory of the SD card by **File Manager** and make sure the file is pasted successfully.

 Select Settings—>About phone—>Software updates, then select SD card update and finish update following tips.

	🖹 🗍 93% 12:28	N 🖬 93% 12:28
