Indicators

When the device is powered on, the following icons may be lighting. For a description of the icons, refer to the following table.

Indicator	Status	Description
Network	Red solid	Error status. Not registered to the mobile network, no (U)SIM card inserted or no network service available.
util	Green solid	Registered to the mobile network.
	Green blinking	Connected to the mobile network and data is being transferred.
	Blue solid	Wi-Fi is active.
Wi-Fi	Blue blinking	WPS is active.
	off	Wi-Fi is off or your device is in sleep mode.

SMS	Blue solid	You have unread messages.		
	Blue blinking	You have new messages.		
	off	No unread messages.		
	Red solid /	The battery is low. Please		
	blinking	charge the battery.		
Batteny	Green	The battery is being charged		
	blinking	or in standby mode.		
	Green solid	The battery level is middle or		
	Oreen solid	high.		
		Your device is turn off and not		
	off	being charged, or the battery		
		is not inserted.		

Connection Scenarios

The Orange 3G hotspot Wi-Fi MF65M creates a personal portable Wi Fi zone which allows several Wi-Fi enabled devices (for example PCs, Apple® iPhone, iPad or iPod touch, or mobile gaming devices such as Nintendo® DSi, Android devices including smartphones and tablets) to share a secure mobile internet connection.

The device can access the Internet and it allows multiple clients to surf on the Internet at the same time, up to ten terminal devices connection. The following figure is for your reference only.

3G Mode: A (U)SIM card can be used to access the Internet.

Installing Your Device

1. Slide the back cover and remove it.

Do not remove the cover rudely.

2. Install a (U)SIM card to the (U)SIM card slot.

Your device does not support the micro-SIM card and nano-SIM card or any other non-standard SIM cards. To avoid damage to the device, do not use those cards or any card holders.

Installing Your Device

3. Install the microSDHC card if necessary.

Installing Your Device

4. Install the battery.

5. Close the back cover.

Using Wi-Fi

- 1. Power on your device.
- Make sure your computer or other client devices have enabled Wi-Fi, and search for available wireless networks.

NOTE:

Refer to your Wi-Fi-enabled client device manual for further details on how to search for wireless networks. If you use a computer, you need to set your computer to obtain an IP address automatically.

 Select the Wi-Fi name (SSID) of your device, and click Connect.

4. Enter the Wi-Fi password if necessary, and click OK.

💇 Connect to a Net	work	×		
Type the netwo	Type the network security key			
Security key:				
	Hide characters			
		OK Cancel		

Refer to the chapter **Getting to Know the Wi-Fi SSID and Password** to get the default Wi-Fi SSID and password.

Wait until the client device is connected to your device successfully.

Using a USB Cable

- 1. Connect a computer to your device with a USB cable.
- Power on your device. The operating system detects and identifies new hardware, and automatically installs the hardware.
 - NOTE: If the system does not automatically launch

installation, you can click the device installation icon in **My Computer** to install the software.

Wait until the computer is connected to your device successfully.

Getting to Know the Wi-Fi SSID and Password

You can view the label on the device to get the default Wi-Fi SSID and password. The label is on the top of the device after you remove the back cover.

Wi-Fi SSID: Orange 3G Hotspot XXXXXX Wi-Fi Key: 12345678

Logging in to the Mobile Hotspot Configuration Page

- Make sure the connection between your device and the client device is correct.
- Launch the Internet browser and enter http://192.168.0.1 or http:// mifi.orange.cm in the address bar.

It is recommended that you use IE (7.0 or later), Firefox (15.0 or later), Opera (10.0 or later), Safari (4.0 or later), or Google Chrome (10.0 or later).

 Enter the password to log in to the Mobile Hotspot configuration page.

The default password is admin.

Changing the Wi-Fi SSID or Password

- 1. Log in to the Mobile Hotspot configuration page.
- 2. Select Settings > Wi-Fi Settings > Basic Settings.
- 3. Change the Network Name (SSID) or the Pass Phrase (Password).
- 4. Click Apply.

NOTE: If you forget the current password, press and

hold the Power button and the WPS button to restore to the default password.

Accessing the Internet

After a client device is successfully connected to your device, you can access the Internet in **Automatic** or **Manual** mode. The default mode is **Automatic**.

Mode	Operation		
	Your device is automatically connected to		
Automatic	the Internet, and you can surf on the Internet		
	through the client.		
	1. Log in to the Mobile Hotspot		
	configuration page.		
	2. Select Settings > Network Settings >		
Manual	Dial-up Settings > WAN Connection		
	Mode > Manual, and then click Apply.		
	3. Select Home, and click Connect or		
	Disconnect.		

To modify the parameters of your device, log in to the Mobile Hotspot configuration page.

Setting data limit

The data usage is measured by your device. Your carrier' s data usage accounting may differ. You can check how much data has been used during the time cycle you set, and set the data limit and warning.

 From the Web UI, click Information > Data Limit Settings to set the data limit settings.

Home	Information	SO Card	5165	Phonebook	USSD	Settings
Device Information	D	ata Limit Settings				
Statistics		ata Linit Ostings				
Duta Limit Settings		Data Use Limit	C Enable	@ Disable		
						Apply
	8					

2. Click Enable and then you can set your data limit.

Home	Information	SD Card	SME	Ptonebook.	USSD	Settings
Device Information Statistics	Da	ta Limit Settings				
Data Limit Settings		Data Use Limit Limit by Monthly * Remind me *	e Enable C Di C Data e Time 0	hour(s)		Apply
	0					

Click Apply to save your settings.

The following procedure describes how to configure the Internet Protocol in the Windows 7 operating system for your Wi-Fi connection.

1. Right-click Network and select Properties.

	Open
Netv	Map network drive
	Disconnect network drive
	Create shortcut
	Delete
	Properties

2. Select Change adapter settings.

 Right-click Wireless Network Connection and select Properties.

4. Select Internet Protocol Version 4 (TCP/IPv4), and click Properties.

To the Owner

- If inadequately shielded, some electronic devices, for example, the electronic system of vehicles, may be affected by the electromagnetic interference caused by the device. Consult the manufacturers of such devices before using the device if necessary.
- Operating the device may interfere with medical instruments such as hearing aids and pacemakers. Always keep the device more than 20 centimeters away from such medical instruments when your device is powered on. Power off the device if necessary. Consult a physician or the manufacturers of medical instruments before using the device if necessary.
- Be aware of the usage limitation when using the device at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed. Power off the device if necessary.

- Do not use electronic transmission devices in aircrafts, at petrol stations or in hospitals. Observe and obey all warning signs, and power off the device in these conditions.
- Do not touch the inner antenna area unless necessary. Otherwise the performance of the device may be affected.
- Do not use the device in an enclosed environment or where heat dissipation is poor. Prolonged work in such space may cause excessive heat and raise ambient temperature, which may lead to automatic shutdown of the device for your safety. In the case of such event, cool the device in a well-ventilated place before turning on for normal use.
- Keep the device out of the reach of small children. The device may cause an injury if used as a toy.
- When the device is operating, do not touch the metallic parts. Failing to do so may cause burns.

To the Users

- Use original accessories or accessories that are authorized. Using any unauthorized accessories may affect the performance of the device and violate the related national regulations about telecom terminals.
- Avoid using the device near or inside metallic constructions or establishments that can emit electromagnetic waves, because signal reception may be affected.
- The device is not waterproof. Keep the device dry and store it in a shady and cool place.
- Do not use the device immediately after a sudden temperature change, because dew may be generated inside and outside the device. Do not use it until it becomes dry.
- Handle the device carefully. Do not drop, bend or strike it. Otherwise the device may be damaged.
- Only qualified personnel can dismantle and repair the device.

 An operating temperature between 0°C and +40°C and humidity between 5% and 95% are recommended.

Using Battery

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- · Do not disassemble or modify the battery.
- When not using the battery for a long period, remove it from your device and store it in a cool dry place.
- Never use any charger or battery damaged or worn out.
- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

If the battery is broken, keep away from it. If it taints your skin, wash your skin with abundant fresh water and ask doctor help if necessary.

Limited Warranty

This warranty does not apply to defects or errors in the product caused by:

- i. Reasonable abrasion.
- End users' failure to follow ZTE's installation, operation or maintenance instructions or procedures.
- iii. End users' mishandling, misuse, negligence, or improper installation, disassembly, storage, servicing or operation of the product.
- iv. Modifications or repairs not provided by ZTE or a ZTE-certified individual.
- Power failures, surges, fire, flood, accidents, and actions of third parties or other events outside ZTE' s reasonable control.
- vi. Usage of third-party products or usage in conjunction with third-party products if such defects are due to the combined usage.

vii. Any other cause beyond the range of normal usage intended for the product.

End users have no right to reject or return the product, or receive a refund for the product from ZTE under the abovementioned situations.

This warranty is end users' sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using of this product, no matter whether or not ZTE had been advised, knew or should have known of the possibility of such damages, including, but not limited to lost profits, interruption of business, cost of capital, cost of substitute facilities or product, or any downtime cost.

Troubleshooting

Problem	Recommended Action
The connection between your device and a PC through a USB cable cannot be established.	 Install the software, and run the installation program in the path of My Computer. If the driver of your device is abnormal, reinstall the software. You need to uninstall the software first.
The connection between your device and a client through Wi-Fi cannot be established.	 Ensure that the Wi-Fi function is enabled. Refresh the network list and select the correct SSID. Check the IP address, and ensure that your client can automatically obtain an IP address. Enter the correct network key (Wi-Fi password) when you connect the client to your device.

Troubleshooting

Problem	Recommended Action
The client connected to the device cannot access the Internet.	 Ensure that your (U)SIM card is available. Change the location and find a place with good signal. Check the settings of the WAN connection mode. Contact your service provider and confirm your APN settings.
The Mobile Hotspot configuration page cannot be visited.	 Enter the correct address. The default address is http://192.168.0.1 or http:// mifi. orange.cm. Use only one network adapter in your PC. Do not use any proxy server.
