Connecting your USB modem and computer.

When you're connected to the internet, the light on the modem will be green. If it shows red, you're not connected.

Connect the USB modem to the USB port of your laptop or computer using the cable supplied. Make sure that the cable is fully inserted.

Installing the USB modem software.

Once you're connected, the software will automatically install itself. You'll first see a new icon in the status bar (see below) and this shows that the USB modem and computer have been connected without any problems.

After a few seconds, the installation will automatically continue. Then just follow the on-screen instructions and wait until you can start using the mobile internet.

If you own a Mac

If you own a Mac, you'll need to install the software using the CD that came with this pack. All you need to do is insert the CD into your disk drive and follow the on-screen instructions.

Disconnecting the USB modem

To make sure that your remove the USB modem safely, please disconnect in the correct way. For example, Microsoft Windows users need to right click on the icon in the status bar, and select Safely Remove Hardware. Follow the on-screen prompts until you're told that it's safe to remove the USB modem.
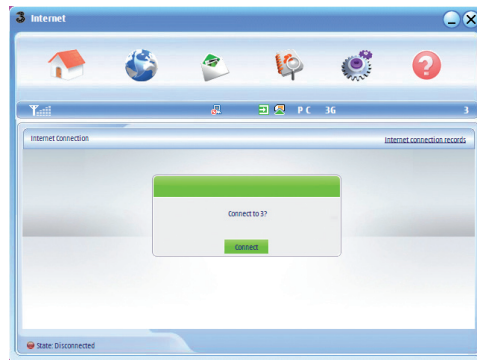

How to use your USB modem.

Once you've installed the software, all you need to do each time you want to use the USB modem is;

› Attach the USB modem to your computer using the supplied USB cable

› Click on the **3** from your laptop or PC.

After you've clicked on the **3** wait for the following screen to appear (this should take about 30 seconds), then click on **Connect** in the pop up window.

The network will show you if your connection is successful. Then you're ready to start using the internet, just like you would do on any other computer.

To end your internet session, just click on **disconnect**.

Usage and safety instructions.

General safety

› The use of electronic transmitting devices is forbidden in aircraft, at petrol stations and in hospitals. Please observe and obey all warning signs and switch off your modem in these conditions.

› Operating a portable PC and USB modem may interfere with medical devices like hearing aids and pacemakers.

› Be aware of warning signs in places such as oil refineries or chemical factories where there are explosive gases or explosive products being processed.

› Store the USB modem out of the reach of children. The USB modem may cause injury if used as a toy or may be damaged by rough play or moisture.

Using your USB modem

› Only use original accessories supplied by the manufacturer. Using unauthorised accessories may invalidate your warranty.

› Avoid using the USB modem near or inside metallic structures or establishments that can emit electromagnetic waves.

› The USB modem is not waterproof, please keep it dry and store it in a cool place out of direct sunlight.

› Handle the USB modem with care. Don't drop, bend, knock or treat it harshly to avoid damage to the unit.

› There are no user serviceable parts. Dismantling the unit will invalidate the warranty.

› Operating temperature range of -20°C to 60°C and humidity 5% to 95% are recommended.
